Un altro infortunio sul lavoro al porto

Vicinanza (Cisal): «Per fortuna solo una ferita al piede, intervengano Asl e Ispettorato del lavoro»

Un nuovo incidente sul lavoro, per fortuna senza gravi conseguenze, fa scattare l'allarme sicurezza al porto. A dare notizia dell'accaduto è **Gigi Vicinanza**, sindacalista della Cisal provinciale, che chiede l'intervento delle istituzioni su quello che rischia di diventare un problema sottovalutato. Vicinanza, infatti, ritiene che nel porto di Salerno «manchino le più elementari misure di prevenzione atte ad assicurare la sicurezza dei lavoratori».

«La scorsa settimana - spiega Vicinanza - un altro operaio è stato vittima di un incidente sul lavoro nella struttura por-

tuale cittadina. Questa volta, per fortuna, il malcapitato lavoratore ha riportato solo una ferita al piede che guarirà con alcuni giorni di riposo. Tuttavia resta la rabbia di chi, dopo le lacrime versate per la scomparsa di Beniamino Tafuri, continua a fare orecchie da mercante alle richieste di aumentare i livelli di sicurezza all'interno dello scalo. Dovevamo piangere un altro operaio per ottenere quello che stiamo chiedendo. Fare impresa in questo modo è davvero sbagliato».

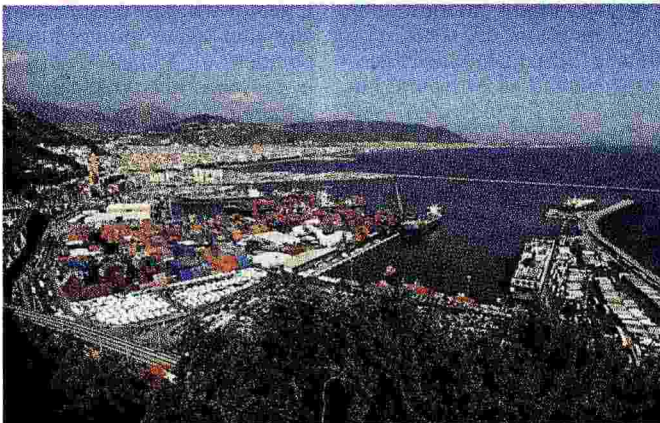

Vicinanza punta il dito non contro l'Autorità portuale «che è in prima linea - evidenzia -

per salvaguardare la salute delle maestranze», ma nei confronti dell'Asl per via dell'assenza «dell'attività ispettiva - chiarisce il sindacalista - figlia di una storica carenza organica del Dipartimento di prevenzione e sicurezza». «Eccezion fatta per i casi clamorosi, come la morte di Tafuri - conclude Vicinanza - il porto di Salerno resta un mondo a parte, con le proprie leggi, in primis quella del silenzio. Rinnovo l'invito a Ispettorato del lavoro, Asl, imprenditori portuali e altre istituzioni ad avere un dialogo con le organizzazioni sindacali. Non possiamo continuare con le di-

chiarazioni di facciata solo quando c'è da piangere la vita di un lavoratore». E proprio sulla sicurezza sul lavoro al porto era intervenuto anche il presidente dell'Autorità di sistema portuale del Mar Tirreno centrale, Pietro Spirito, in occasione dell'incontro, presso la Stazione marittima, del Comitato di gestione. «La sicurezza - aveva detto Spirito - è un presupposto irrinunciabile. C'è da lavorare molto anche sull'aspetto psicologico, oltre che sulla formazione, perché sicurezza non significa solo mettere il casco ma anche prestare attenzione durante lo svolgimento delle mansioni».

Gaetano de Stefano

IL FATTO/ Operaio ferito ad una gamba prognosi di pochi giorni

Incidente al Porto di Salerno

Incidente al porto di Salerno. “L’ennesimo incidente al Porto di Salerno non è finito sotto i riflettori e dunque non fa notizia. Forse un altro operaio doveva morire per meritare l’attenzione di chi snobba la questione sicurezza all’interno della struttura”. La denuncia arriva da Gigi Vicinanza, sindacalista della Cisl provinciale, che chiede l’intervento delle istituzioni su quello che rischia di diventare un problema sottovalutato. “Qualcuno forse ha pensato bene di nascondere la notizia, ma la scorsa settimana un altro operaio è stato vittima di un inci-

dente sul lavoro al Porto di Salerno. Questa volta, per fortuna, il malcapitato lavoratore ha riportato solo una ferita al piede che guarirà con alcuni giorni di riposo. Tuttavia resta la rabbia di chi, dopo le lacrime versate per la scomparsa di Beniamino Tafuri, continua a fare orecchie da mercante alle richieste di aumentare i livelli di sicurezza all’interno dello scalo. Dovevamo piangere un altro operaio per ottenere quello che stiamo chiedendo. Fare impresa in questo modo è davvero sbagliato”. Vicinanza, dunque, ribadisce che al Porto di Salerno

mancano le più elementari misure di prevenzione atte ad assicurare la sicurezza dei lavoratori. “Sappiamo che l’Autorità Portuale resta in prima linea per salvaguardare la salute delle maestranze, ma è innegabile che l’assenza dell’attività ispettiva da parte dell’Asl, figlia di una storica carenza organica del Dipartimento di prevenzione e sicurezza, si vedono e si notano. Eccezion fatta per i casi clamorosi, come la morte di Tafuri, il porto di Salerno resta un mondo a parte, con le proprie leggi, in primis quella del silenzio.
